Introduction

Motivated Java Developer with a degree in Electrical and Electronics Engineering and experience in developing Java-based applications. Proficient in **Java**, **Spring**, **Hibernate**, and **OOP**, eager to contribute to a dynamic team and build innovative software solutions.

Technologies

Languages: Core Java, Advance Java, MySQL, JavaScript, J2EE

Technologies: HTML, CSS, ReactJs, Hibernate, Spring Core, DBMS, RDBMS

Projects

Online Expense Tracker

- A user-friendly platform to log, manage, and analyze personal expenses with real-time tracking and categorized summaries. Interactive dashboard: Visualize spending trends with dynamic charts and tables for better financial decisionmaking.
- **Tools Used:** HTML, CSS, JavaScript, Java, JSP, Servlets, Hibernate, MySQL, Apache Tomcat.

Online Food Delivery Application

- Developed a comprehensive and user-friendly online food delivery web application, "Tap Foods," designed to facilitate efficient food ordering and management for both customers and administrators. The platform includes dynamic menu and order management features, secure user authentication, and a seamless checkout experience.
- **Customer Perspective:**
 - Secure login, profile management, and order tracking.
 - Dynamic restaurant menus with real-time availability and ratings.
 - Session-based cart with seamless checkout.
- **Administrator Perspective:**
 - Manage restaurants, menus, and customer orders.
 - Real-time updates for menu availability and pricing.
 - Order tracking with reporting tools.
- **Tools Used:** HTML, CSS, JavaScript, Java, JSP, Servlets, Hibernate, MySQL, Apache Tomcat.

Achievements

Leetcode 200 Days batch	Dec 2024
